

Download File PDF Psychology Chapter 5 Test Answers

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Psychology 1 - Introduction to Psychology
Exam - Chapters 5-6
Summer 2009 (Dr. S. Lee)

Attention All: Please come to class tomorrow in turn in your scanner. If you want to know how you did, bring a printed copy of the test so you can check your answers with the key. If you do not complete the test at home you can take the exam in class. If you will be completing the test in class you must be here at 10:00 AM to take the test. You have until 12:00PM to complete the test and can use your notes and books. Also, you MUST PRINT OUT your own exam. None will be given to you tomorrow. Best of luck!

Name: _____ Date: _____

1. When she was a child, Sherril ate a whole box of marshmallow candy bunnies at Easter and got very sick. Today, just the sight of a package of these candies makes Sherril nauseous. Sherril's learning to be sick at the sight of the package is an example of learning through _____.
A) reinforcement
B) punishment
C) reward
D) association
2. _____ is a form of learning in which a neutral stimulus is paired with an unconditioned stimulus in order to produce a conditioned response.
A) Operant conditioning
B) Observation and modeling
C) Classical conditioning
D) Intelligence
3. Maria notices that her cat comes running to the kitchen every time Maria uses the can opener. Maria's cat has been classically conditioned, and the sound of the can opener is the _____.
A) UCS
B) CS
C) CR
D) UCR

4. All but which of the following are elements of classical conditioning?
A) The individual learning can determine whether the stimulus is presented or not.
B) A behavior is changed rather than learned.
C) The conditioned and unconditioned stimuli are associated closely in time.
D) The conditioned stimulus serves as a reliable signal for the occurrence of the unconditioned stimulus.
